

## Bob Grier

---

With an extensive background in standardized, multi-site construction management, Bob Grier leads all engineering, procurement, construction (EPC) and services for SunEdison installations globally.

With over 25 years of EPC and complex logistics management, Grier brings standardized construction and operations management to photovoltaic system deployment by technicians anywhere around the world. His teams quickly and effectively adapt to the specific needs of each market, while also maintaining a strong focus on standards and quality control.

Before joining SunEdison, Grier held leadership positions with Centex Homes, including Vice President of Construction and Manufacturing. Centex is the fourth largest homebuilder in the United States. Prior to joining Centex, Grier worked for General Electric Company in a variety of engineering and manufacturing leadership positions. Grier has significant global experience working in both Europe and Asia, supporting the creation of two joint ventures in the silicones industry.

Grier holds a BS in Chemical Engineering from the University of Colorado in Boulder. He is a certified Six Sigma Master Black Belt with GE.
