SunEdison LLC Joins CanSIA as a Corporate I Member

CanSIA Announces Number of Corporate I Members Increasing!

OTTAWA, ON – January 29, 2007 - The Canadian Solar Industries Association (CanSIA) is pleased to announce that SunEdison LLC, North America's first and largest solar energy service provider, has joined the association as a Corporate I member. SunEdison LLC has been added to the growing list of larger corporations, government agencies and industry supporters who believe that a strong national association is the keystone to the development of a vibrant Canadian Solar Industry.

"SunEdison LLC is a single-source solar provider; from feasibility analysis, sales and financing through installation and maintenance. They are a well-established market leader with operations in all active PV solar regions, and we are glad to have forged this alliance with them," says Andrew van Doorn, President of CanSIA. "We look forward to stronger relations and their involvement in association activities in the year ahead."

"We are pleased to join CanSIA. We look forward to contributing to the increased deployment of solar in Canada which, as a nation, is an emerging worldwide leader," stated Jigar Shah, CEO of SunEdison.

Corporate I members such as SunEdison LLC enjoy a variety of membership benefits, most important of which is their higher exposure and recognition as an important contributor to the solar industry. Corporate I membership also enables CanSIA to become more proactive in advocacy in solar industry issues that are of concern to our members and benefit the industry as a whole. SunEdison LLC joins their solar industry colleagues Carmanah Technologies Corporation and Xantrex Technology Inc. as Corporate I members.

About SunEdison LLC
