

SunEdison Names Brian Jacolick General Manager, North America

New Role Reporting to CEO Will Oversee All North American Operations

June 12, 2008 – Beltsville, MD – SunEdison, North America's largest solar energy services provider, today announced that Brian Jacolick has been named General Manager – North America.

Based in Beltsville, Jacolick will report directly to SunEdison CEO Thomas (Tom) Rainwater and will oversee all business operations for SunEdison in North America, including U.S., Canada, and the Caribbean. Jacolick previously served as Vice President of Sales, leading the development of solar programs for marquee organizations including Kohl's, Staples, Wal-Mart, the State of California, and most recently Duke Energy.

“Brian is the right person for this important role,” noted Rainwater. “He has significant depth of experience in solar energy, with more than 1,000 solar systems to date including installation, finance, operations and sales. Brian’s programmatic approach to solar energy services helped SunEdison become the largest solar energy services provider in North America by supporting leading organizations to produce clean, reliable and predictably priced renewable energy as a hedge against increasing electricity rates.”

“I am privileged to work with the most innovative and experienced team in solar energy services,” said Jacolick. “Leading companies, utilities and government entities understand the financial and environmental opportunities available to them by using solar as part of a total energy portfolio. Simplifying that process for them is a commitment that we make everyday to every customer.”

About SunEdison

Sun Edison LLC is North America's largest solar energy services provider and operates across a global marketplace. SunEdison provides solar-generated energy at or below current retail utility rates to a broad and diverse client base of commercial, municipal and utility customers.
